(1) Number of companies are best estimate

(2) Invested Capital is the Transaction Size and is described as purchase price plus unfunded obligations. Funded capital is the amount funded in each Transaction. The Net Multiple (TVPI) for SOF and SOF D is 1.8x and 2.3x respectively. Converted from EUR to US\$ using a rate of 1.1822.

(3) The performance figures are based on unaudited fair values and should be read and reviewed in conjunction with the "Important Information" and "Important Performance Information" sections. Gross returns are gross of fees, expenses and carried interest, which are not charged at the investment level so performance is not expected to be representative of investment returns to investors. Investors should consult with their own advisers as to the appropriate factors to be considered in evaluating this information. Past performance is not a prediction of future performance, but it is included to demonstrate the track record of the Glendower SOF Team and there can be no assurance that SOF IV will achieve comparable results or that any target results will be achieved.

(4) Hoover transactions represent the investments made by SOF via a special purpose vehicle ("SPV") attracting additional accounting and administrative expenses. The actual performance for the SPV may be lower than the performance of the individual investments because of the additional accounting and administrative expenses. The aggregate net multiple of this SPV, including the fees and expenses is 1.9x.
