Between my team and COO team, we have fully aligned the analysis and have structured the ask to the booking centres. It will go out following some clarifications with AFC first thing tomorrow morning (CET), we are keen to get a precise ask out and leverage resources best. During the course of tomorrow (morning) the ask will go out.

I understand from Jan Wa that the colleagues are already alerted and should be able to providing quick answers in terms of scoping (or feedback that system driven analysis is not possible in certain cases).

Attached also 3 slides, not yet the prettiest, covering the following:

- 1) outline of the review triggers and some first numbers re scope (will be updated on on-going basis as we will get answers from BCs)
- 2) a rationalisation on why Negative Media Alerts are the focus in the wider focus of control and information around client relationships
- 3) a prioritisation grid of case constellations, the JE case probably belonging to the very top constellation - may be useful in further discussions

<July\_2019 File Review.pdf>

For the SB session, we will obviously add scope, progress tracker, timeline and revamp some of these slides. But thought that the attached would be useful already tonight and you may want to use in your discussion with
