

1) We need to know the account balances for each of the Southern Financial Relationship brokerage accounts on 12/31/2014 as well as the current balances. Unfortunately, we don't have system visibility into brokerage accounts anymore.

2) For outflows, we need a better understanding of where large (\$1MM+) wires were and are going. Is there a way to pull all wires over \$1MM and where they were sent? More concerned with anything leaving the DB umbrella.

Thanks in advance. I realize #2 will likely take some leg work... we are most concerned presently with #1.
