

DB's Leadership Position was Made Possible by the Strength of the Market-leading Research Group in the Space

— The genesis of most of Deutsche Bank's Risk Premia investment strategies is the research of the Quantitative Investment Solutions (QIS) Research group.

- The group consists of seventeen professionals in the US, Asia, and Europe, with additional offshore support
- The group has consistently ranked at the top of investor surveys – most recently, the group ranked #1 in the 2016 All-Europe Institutional Investor Research Survey and #1 in the most recent (2015) US Institutional Research Survey.
