

Table of Contents**Negative public or community response to the development of power projects in general, or to the call right projects specifically, could adversely affect our ability to acquire additional projects and thereby limit our ability to grow our CAFD.**

Negative public or community response to power projects in general or the call right projects specifically could adversely affect our ability to operate our power generation projects. This type of negative response can lead to legal, public relations and other challenges that impede our Sponsor's and third-party developers' ability to meet development and construction targets and achieve commercial operations for projects on schedule. This could lead to an adverse effect on our ability to acquire additional projects and grow our CAFD. For example, some projects in India are and have been the subject of administrative and legal challenges from groups opposed to power projects in general or concerned with potential environmental, noise, health or aesthetic impacts, impacts on property values or the rewards of property ownership, or impacts on the natural beauty of public lands and rivers. An increase in opposition to requests for permits or successful challenges or appeals to permits issued to developers of power generation projects could have a material adverse effect on our acquisition plans.

In addition, negative public opinion of energy projects in particular could adversely affect our ability to operate our projects. Among concerns often cited by local community and other interest groups are objections to the aesthetic effect or noise disruption of plants and wind farms on rural sites near residential areas, reduction of farmland and the possible displacement or disruption of wildlife. We expect this type of opposition to continue as our Sponsor and other developers complete projects and construct future projects. It is possible that we may also face resistance from aboriginal communities in connection with any proposed expansion onto sites that may be subject to land claims. Opposition to our requests for permits or successful challenges or appeals to permits issued to us could lead to legal, public relations and other drawbacks and costs that impede our ability to meet our growth targets, continue operations for a project on schedule and generate revenues.

We are subject to environmental, health and safety laws and regulations and related compliance expenditures and liabilities.

Our assets are subject to numerous and significant national, provincial, state and local laws, including statutes, regulations, guidelines, policies, directives and other requirements governing or relating to, among other things: protection of wildlife, including threatened and endangered species and their habitat; air emissions; discharges into water; water use; the storage, handling, use, transportation and distribution of dangerous goods and hazardous, residual and other regulated materials, such as chemicals; the prevention of releases of hazardous materials into the environment; the prevention, investigation, monitoring and remediation of hazardous materials in soil and groundwater, both on- and off-site; land use and zoning matters; and workers' health and safety matters. Our facilities could experience incidents, malfunctions and other unplanned events, such as spills of hazardous materials that may result in personal injury, penalties and property damage. In addition, certain environmental laws may result in liability, regardless of fault, concerning contamination at a range of properties, including properties currently or formerly owned, leased or operated by us and properties where we disposed of, or arranged for disposal of, waste. As such, the operation of our facilities carries an inherent risk of environmental, health and safety liabilities (including potential civil actions, compliance or remediation orders, fines and other penalties), and may result in our involvement from time to time in administrative and judicial proceedings relating to such matters. While we have implemented environmental, health and safety management programs designed to continually improve environmental, health and safety performance, we cannot assure you that such liabilities, as well as the costs for complying with environmental laws and regulations, will not have a material adverse effect on our business, financial condition, results of operations and cash flows.
