

## Table of Contents

clean power generation assets, including natural gas, biomass and hybrid energy and storage solutions, as well as transmission lines, that enable us to provide power on a 24/7 basis, as well as to add solar generation assets serving residential and commercial building customers.

## Our initial portfolio

The following table provides an overview of the assets that we expect will comprise our initial portfolio. We expect to acquire certain of the projects included in our initial portfolio through the consummation of the Pending Acquisitions and the transfer of the Contributed Construction Projects. Our initial portfolio includes: (i) approximately 428.6 MW of projects that we expect to acquire substantially concurrently with this offering; (ii) approximately 340.9 MW of projects that we expect to acquire shortly after the completion of this offering upon receipt of pending governmental and lender consents; and (iii) approximately 286.8 MW of projects that we expect to acquire during the remainder of 2015 when such projects are expected to reach COD. This offering, however, is not conditioned on the concurrent closing of all of the Pending Acquisitions. As of the date of this prospectus, we have not yet received all of the governmental, regulatory or third-party approvals or consents required to complete all of these acquisitions, and the timing for those approvals is outside of our control. As a result, we cannot assure you that all of the Pending Acquisitions will be consummated on the timetable currently contemplated or at all.
