

## Additional Disclaimers Cont'd

- **References to Specific Companies/Securities.** To the extent that this document contains references to specific companies and/or securities, such references are presented solely to illustrate the application of Alkeon's investment process and should not be considered a recommendation of any particular company or security.
- **Comparisons to Indices.** Alkeon believes that, although the Alkeon Funds – which include Growth Strategy, Growth Asia Strategy, Capital Partners Strategy and Select Series Strategy – are absolute return vehicles not benchmarked to any index, comparisons to certain indices are useful in evaluating the performance of the Alkeon Funds. The MSCI World Index captures large and mid cap representation across 23 developed markets countries. With 1,652 constituents, the index covers approximately 85% of the free float-adjusted market capitalization in each country. The MSCI AC World Index captures large and mid cap representation across 23 developed markets and 23 emerging markets countries. With 2,491 constituents, the index covers approximately 85% of the global investable equity opportunity set. The Alkeon Funds' portfolios contain equity securities and may consist of securities issued by companies in different countries with varying capitalizations and fixed income and non-equity investments, including short sales of securities and margin trading, and are not as diversified as the securities (when aggregated) that comprise the MSCI World Index or the MSCI AC World Index. Unlike the performance of the Alkeon Funds, the performance of the MSCI World Index and MSCI AC World Index do not reflect the impact of fees or expenses. The index performance shown does not reflect the reinvestment of dividends and other income. Any such comparison between the performance results of the Alkeon Funds and the MSCI World Index and MSCI AC World Index should not be relied upon as an accurate prediction of future results.
- **Sources of Information.** Morgan Stanley Fund Services and BNY Mellon provided certain of the performance information shown above. Gross and net exposure estimates are obtained from the Morgan Stanley Performance Measurement (MSPM) System. Bloomberg provided the performance data for the indices shown. The information from these sources is believed to be accurate, but Alkeon makes no guarantee as to the accuracy or completeness thereof.
