

Table of Contents

- (1) The number of shares of common stock outstanding immediately before this offering takes into account the conversion of profits interests and assumes (i) the shares are offered at \$24.50, which is the midpoint of the estimated offering range set forth on the cover page of this prospectus and (ii) all shares offered by us in this offering are sold. An initial public offering price of \$26.00, which is the high point of the estimated offering range set forth on the cover page of this prospectus, would increase the common stock outstanding immediately before this offering by 300,493 shares. An initial public offering price of \$23.00, which is the low point of the estimated offering range set forth on the cover page of this prospectus, would decrease the common stock outstanding immediately before this offering by 339,687 shares. See "Principal Stockholders."
