- Income (covered call writing)  
  Portfolio Protection (protective puts)  
  Speculation (option buying, spreads and uncovered writing)

Client(s) Strategy Requests (Please check as many of the following strategies sought to be employed)

- 1. Covered Call Writing  
Moderate Risk. Calls fully covered by underlying stock. Stock may be called at any time or at expiration, requiring owner to sell at strike price.
- 2. Purchasing Options  
Involves Substantial Risk. Entire premium is at risk. Profit or loss usually determined by selling position. If position is not closed or exercised by expiration date, options will expire worthless.
- 3. Option Spreads—Margin account required.  
Involves Substantial Risk. In addition to risk of purchasing puts or calls, if long side is closed out, leaving only a short position, the financial risk becomes unlimited. Option assignments require purchase of the underlying stock in the open market to effect delivery to purchaser of option.
- 4. Uncovered Put Writing—Margin account and special statement for uncovered option writers required. Involves Substantial Risk. If assigned, the client must purchase the underlying stock at the strike price, which may be substantially higher than the then-current market price.
- 5. Uncovered Call Writing—Margin account and special statement for uncovered option writers required. Involves Substantial Risk. Writing uncovered calls involves unlimited financial risk. Option assignments require purchase of the underlying stock in open market to effect delivery to purchaser of option.
