Thanks Stew.

As discussed, please find a pull of your pipeline from November 02. I've filtered it for anything with probability greater than 50% and due to close in the next 90 days (from 11/02).

Please can you update any data needed in the excel and return to me (please show what you've changed). In addition, these changes will need to be reflected in db Force for the next pull.

Thanks!

Henry

Subject: Client coverage/ Orix

Stew,

One of the action points arising from the client coverage exercise a few
weeks ago on Orix was to discuss global renewable energy opportunities. In
the new CIB coverage structure there is no one who really covers renewable
energy. No longer a focus sadly. Perhaps KCP can help you on the Markets
side of the Bank. I cc Todd.

Ed on my team might be able to connect you externally to a person who runs a fund in that space. She might be a good connection.

Best

Kind regards,

Karim Barrada
