Jeffrey -
Our US FX traders agree/like Nav's call here. The 3-month 1.10/1.13 USDCAD, 1.17 knock-in call spread (where that 1.13 short call only exists if USDCAD goes to 1.17 during the life of the trade) described below is currently offered ~1.1% (Source: DB FX Sales, 1/17/14). Please see the investment thesis below and let us know your thoughts.

Best,
Tazia

USDCAD calls to position for further weakness in CAD. Spot FX is currently 1.095. [I]

Classification: For internal use only

I like USDCAD call options to position for further weakness in CAD. Spot FX is currently 1.095.

Over the course of the past week the interest rate curve has started pricing in a small amount of rate cuts - this development is significant and clearly a beginning of a pain trade. I believe it can go further. Lower CAD rates from here will drive USD CAD higher.

<mime-attachment.gif>

The limited downside play I like best in USDCAD is buying a 3month expiry 1.10 / 1.13 call spread on USDCAD but where the short 1.13 call position only exists (knocks-in) if USD trades at 1.17 trades in the market before the option expires, otherwise the option payoff is the same as a 1.10 call option.
