yes we are a player, Tazia is interchanging with our traders directly and wants to get you whatever/however you want it, perhaps we should connect you directly, we should discuss

i see the emails on ipos, we should talk about the process that we just started for you, i know painful but we should be able minimize the back and forth on the sell side, we went through a number of your positions this a.m including the oil trade and tazia was about to update you on when you asked, every client is different and we customize but i think she now knows the info you want to see to review a decision
