This is for comparative purposes, as the worst-of component (previously sent/below) improves pricing a quite a bit at present. 13mo on SX5E by itself is a non-starter!

#1 - 13mo Contingent Minimum Return  
SX5E  
4% Cont Min Return  
80% Barrier Daily obs.  
6% cap  
max loss: 100%

#2 - 2yr Contingent Minimum Return  
SX5E  
10% Cont Min Return  
80% Barrier Daily obs.  
17% cap  
max loss: 100%

Indicative levels only, subject to market movement, source: DB AWM Structured Solutions, 2/5/14.

US

ADP report came in light this morning at +175k v 185k cons, as you saw, payrolls catalyst on Friday. For US exposure on pullback and jump-up in volatility, consider (proposed percentages = 5.0):

S&P Current: 1742  
80%: 1394

Russell 2000 Current: 1086  
80%: 868

13mo Contingent Minimum Return Worst-of Note (S&P 500 and Russell 2000):  
WoF SPX/RTY  
8% Cont Min Return  
80% Barrier Daily obs.  
29.30% Cap

Indicative levels only, subject to market movement, source: DB AWM Structured Solutions, 2/5/14.

#### Europe

Note: your current Eurostoxx Contingent Note matures 8/26/14, cont min was 4%, cap was 17%, barrier was 70% (1935). A direct comp to your existing structure is currently not pricing well (10.0 on proposed sheet, 5.0 on suggested). Combining US and European views improves the terms and upside participation:

SX5E Current: 2962  
80%: 2369

13mo Contingent Minimum Return Worst-of Note (Eurostoxx50 and Russell 2000):  
WoF SX5E/RTY  
11.5% Cont Min Return  
80% Barrier Daily obs.  
uncapped

Indicative levels only, subject to market movement, source: DB AWM Structured Solutions, 2/5/14.
