I wasn't sure whether to be excited or terrified when i read your email this morning! having flashes of that gatica movie or that speilberg's "A.I."

We're set up on the listed options now.

I called you today re: AAPL. Your in-the-money buy-and-write is pricing on top of spot. Let me know if you would like to work a spread at a limit.

AAPL reports 10/28, stock goes ex on 11/7 (know dividends aren't as attractive

to you as appreciation). buy the rumor/sell the news risk in the stock after its 10% move since 10/7.

Example:

AAPL spot \$530.86

Jan 265 puts 264.95 x 267.20

We are almost there with otc derivatives/isda - darren is excellent. so far underliers of our pending trades have been patient for me as far as entry points.

Please let me know if you want to move forward with AAPL or wait.

Best Regards,
Tazia

Good Morning Jeffrey –

Thank you for the meeting yesterday – fantastic spending time with you and we're excited to get to work. Per our discussion:

- (1) Enter USDMXN "Deposit Plus" (consider a lmo with a 13.20 strike, ~6%. Indicative levels below)
- (2) USDJPY risk reversal (1yr 97.84(atmf)/90)
- (3) AAPL in the money buy-and-write (earnings on 10/28)
- (4) Buy USD Payer Swaption (or spread)
- (5) Begin profit-taking among long-duration/perpetual preferreds
- (6) Holding ARIA (call option at this point, bellwether for other biotech trades)

(7) WTI option to monetize spike - and reversion! - within 6mos

Darren and I are finalizing the ISDA. I will refresh levels and call you to trade once that agreement is executed.

Call you on AAPL/listed trades in the interim.

Speak with you soon,

Tazia

PS. I read the NYT article on yeast engineering!
