Thanks Apurva - those levels are in line w what I priced last night.

Nav was right in that despite Jeffrey's request for a renminbi call at ~40bps, which is inline with a USDpCNHc ATMS offer and implies he has a view that renminbi could strengthen further vs the dollar, he came back wanting a USDCNH call, which, as we know more expensive from an upfront premium perspective.

Will show atms, atmf and your call spread.

Thanks! be back

Tazia

Hey Tazia

Following are the indicative levels on trades that Nav mentioned - from trader Ritvik Singh (for size \$50mm or lesser)

(Spot 6.1601; Fwd 6.2746, i.e. 101.86% of spot)

1y ATMS (6.1601) put: 0.276% / 0.38%

1y ATMF (6.2746) put: 1.039% / 1.174%

Uzair highlighted, one comment in choosing between the ATMF and ATMS puts would be that if the client picks the ATMF, although he has a larger up-front

(1.174% vs 0.38%), he has a better break-even price (6.201 vs 6.137). So basically if spot goes nowhere in 1 years' time, he still ends up ITM on the trade.

1y ATMF / ATMF -2% put spread: 0.792% / 0.94%

Strikes: 6.2704 / 6.145

Put spread costs 20.3% lesser than the vanilla ATMF put (not great)

Max payout of 2.1m for premium of 1m

Not looking great. And if we try to bring the lower strike closer for more cheapening, the payout ratio falls below 2

1y ATMF / ATMF +3% call spread: 0.567% / 0.74%

Strikes: 6.2704 / 6.4585

Call spread costs 39.2% lesser than the vanilla ATMF call

Max payout of 4.1m for premium of 1m (quite acceptable)

Kind regards,

Apurva

Yep, that's what I figured. Thx for confirming.

DB Pricer has got USDpCNHc 8/10/15 ATMS at 25.3bps/38.6bps on 50mm USD notional, right in line with Jeffrey's 40bps.

You mind sending through indic levels from the traders, 4 solutions Nav identified, and we'll aim to trade early AM EST. Right now, I'll pin down which time zone JE is currently in...

thanks!

Re: [C]

Hi,

CNH trades about 6bn a day and a large proportion of the flow is global macro guys so liquidity in London hours is rarely an issue - I've traded clips of 50mn in London afternoon without any issues.

Rgds,

Uzair

Perfect Nav - thanks guys! and i'll use Pricer too.

Most liquid time to trade? thinking we do want to go through London, or is liquidity that much better asia hrs? let me know, thx!

Subje Re: [C]
ct:

Classification: Confidential

Uzair + Apurva

While Vinit and I are travelling in Zurich can u get from fx trading in the overnight session the following structures

ly usdcnh atms vanilla put
ly usdcnh atmf vanilla put

A call spread and a put spread also ly both with one leg having atmf in it. The second strike can be a few pct away - see what makes sense from the prices

Ie 4 structures

The reason I'm asking for both sides (up and down) is in case the client below really wants a usdcnh call rather than the cnh call he requests. Then we are covered for all eventualities.

Incl spot and fwd

Let trading know size is usd50mm or less. Def check w trading don't rely on pricer for this one (but check urself on pricer)

Thx
Nav
