What now

He's basically saying that all the stuff bill told me to say is already being done by others and that health care has an advocacy strategy (without this) etc etc

06:12:02 pm

Should I reply Larry only and copy bill and say great looking forward to the conversation or just have a bunch more conversations or what? It's getting ridiculous

06:12:45 pm

And --- arianna huffington just stated a new org called THRIVE with money from folks like jack ma etc.

She's a great advocate and supporter of women and could be a good place for me to consider in some capacity right after bgc3

I will see her Monday
