See last sentence

the generation of functional cardiomyocytes, astrocytes and osteoblasts. In degenerative diseases that lack an obvious source of renewable cells, we employ approaches to regenerating functional tissue through regulated proliferation of somatic cells, such as pancreatic beta cells, and retinal pigment epithelial cells. Finally, Calibr is attempting to identify drugs that block the stress and oxidative pathways contributing to many age-related disease.

How do these roots survive only in the light

01:54:36 am

MW

Are you in NYC Saturday morning

02:13:40 am

yes

05:02:47 am

MW

I'm seeing Boris Friday night / will sleep there and then have time morning before I come back to DC. Can I come over and play

02:00:58 pm

of course

02:01:48 pm

Was thinking last night  
Why does the stomach growl?

Like you have to exhaust all of your chemistry to make a physical noise in your gut. Is that vagal exhaustion?

02:49:34 pm

Not talking about gut noises (gas) but hunger growl. Is that stomach and gut physically stimulating vagus to tell brain to eat

02:51:14 pm
