Someone sent me that crazy thing had never heard of it

04:04:40 pm

Would love a plan but maybe I just be s doc here in seattle -

04:05:56 pm

Had an idea to propose to BG that might link and improve all the things he's trying to address as it relates to Alzheimer.

Might be a way to bring pieces together in a different and potentially impactful way.

We can talk Thursday or Friday but for now my plan is to do endovascular neurosurgery and take over the clinical service sometime next year and just be a clinician. Can apply for grants or try to build stuff from the UW, Or just be a practitioner.

Seems I can't really depend on others to build a career and maybe sticking to my core strengths is just fine. Being a doc isn't gonna change the universe or make a billion jillion dollars but it is legit and something I can control and do ...

08:20:05 pm

I will do my best to bring some of BG dreams to life as best I can in the time I've got.

08:20:33 pm

And if something t works out w plants and sciences great.
