Last few days figured something out that could be a very cool way forward scientifically

It allows for a new methodology that could treat degenerative diseases but also (in the peripheral nervous system) could manage pain in a whole different way

07:01:15 pm

Or at least peripheral neuropathy pain which is most

07:01:30 pm

I don't want to talk to anyone about it because it is a once in a lifetime thing

07:01:52 pm

I've looked though the patent filings are there are some related things but I'd like to start by somehow protecting the idea. BG can't keep a secret. Nathan either. Need someone to help me!
