2017/07/12

Dinner w BG and larry tonight (with 2 other men)
Then on flight to London for the Alzheimer conference and will be there all week

Talk soon, hope!

10:24:42 pm

MW

1212 5333739

Ask him if he will match me. In an investment in you

10:49:56 pm

OC

Thank you for believing in me.

11:04:44 pm

Let's see how this goes

11:04:57 pm

MW

2017/07/13

Will talk to larry in more detail later this month or early August.

B didn't say anything

12:43:43 pm

En route now to the Alzheimer mtg in London. Let's talk soon. Hope Paris is still fun ...

12:44:41 pm

[REDACTED]

Hi from London
Bedtime but

12:54:32 am

"Which leads me to the topic of this important conference, namely, pipeline operations and management. I am delighted to inform you that Saudi Aramco has over the past several years developed and deployed a wide range of cutting-edge technologies, covering various pipeline operations domains, including pipe-wall integrity, in-line inspection tools, cathodic protection monitoring, corrosion prevention, control valves for erosive services and large-diameter valve diagnostics to name a few," he says."

Was researching endovascular (neurosurgery) technologies and there is a ton that Saudi Aramco is doing that applies directly and immediately to vascular disease super Cool

12:55:30 am

MW Oil pipes not so different from vessels

12:55:40 am

1212 5333739

How was it
09:36:51 pm

o

[REDACTED]

Never sure w BG. Always feel like each time will be the last. Larry there. Will see Larry first week August.

BG didn't say a word about supporting me. Concretely he says "I will always support you" but I don't know what that means. He says talk to Larry.

They seem happy or at least not angry w my work so far.

10:42:01 pm

EFTA01613161

Just met a super smart and kind guy and his wife - he runs WREN which is a 5b Kuwaiti fund. He's a computer scientist by background and or originally Moroccan. His wife is also a computer scientist and her father is a Moroccan billionaire. Very very nice. We talked about billg and science and health and they asked how they could help ME. So nice. We discussed endovascular and the trends in health sciences and how computers have changed the game. We discussed nerves and how there may be common roots bioenergetics roots across all degenerative conditions. They had some great ideas and so smart. Anyway - Hakkim and Lamiaa Drissi - super super nice. London based.

11:16:39 pm

Very very smart. Both of them. And kind. Gives me hope!

07:18:13 am

MW

Not the part about plant rights but some interesting other stuff

07:18:13 am

1212 5333739

you need to focus on

10:26:28 am

ONE thing only,

10:26:34 am

oo

[REDACTED]
It's all the same thing

10:58:01 am

And if it isn't super granular - at least st the beginning - no one will listen

10:58:34 am

MW

I have one technical domain

10:58:52 am

1212 5333739

you mean vasculatory, either mobil exon and plants. . it has a low likelihood of being right as your lens is seeing the world through your own views. it should be a warning .

11:01:57 am

oo

I don't know if any theories are ever right - they get better with collaboration and thought and time

No I mean my clinical domain / doctor stuff

11:04:02 am

Wish I had a zillion skills and ideas and talents but I don't. And as you know - I'm not a spring chicken anymore... wasted a little too much time trying to save the world...

I've not yet formulated a working hypothesis nor do I know exactly where to best put my energy beyond my clinical skills.

I've also not put forward any theories or asked anyone (beyond asking BG if he would invest in me after my c3 time) to take a bet on me.

Seems prudent to me to wait until I have something more tangible/actionable. Or, to sit and brainstorm with you or the third rock folks and figure out if there is truly something to pursue that doesn't waste time goodwill and money.

Plants would be great and creative and lots to do and learn but there needs to be something actionable to build a business. I don't know what that is yet. You probably do!

Love thinking about what could be possible to translate from plant physiology to human physiology but lord knows.

So instead I have to use my time to do what I understand and what doesn't require the time and help of others and that is clinical work. It's a great backup plan in case nothing else emerges. Plus, it's also fun and legitimate.

Thank you for helping me and thinking alongside me. I appreciate it.

11:22:23 am

Wish I had a magic wand. I've been a worker bee.

11:23:30 am

MW

1212 5333739

your skill set does NOT translate into money. I'm ok if you want to pursue. first you need to set your GOALS clearly .

11:24:05 am

oo

[Redacted]

MW

But thank you again for all these years of thinking alongside me.
11:24:06 am

1212 5333739

if it is money, ok, if it pursuit of ideas ok. if it a surgeon. ok, I think we could have fun, but each time you veer off course. . following the next
11:25:14 am

bright light
11:25:43 am

MW

All I can do and control and be is a doctor ... and it's not a fancy living but it is a respectable one/salary etc.

I've never veered from my hopes to be rich rich rich.

I got promised that if I took the time to work hard I would be rewarded. Never was.
11:26:10 am

1212 5333739

not by me, I have been consistent africa a waste . policy a waste. . plants are the way to get rich. . rich rich .
11:26:46 am

o

[Redacted]

I've never stopped being a doctor since I was young. I will always try to keep that up because it is my job security. All I've got
11:26:48 am

You are right and you have always told me Africa a waste
11:27:06 am

Plants could be super awesome
11:27:22 am

There is a lot to do there

11:27:35 am

Wide open space and lots of potential. You are right.

Getting started is the hard part.

MW

11:28:34 am

1212 5333739

that is the future , the starting point needs thought .

11:29:03 am

o

[REDACTED]
BG has been a huge distraction

11:29:05 am

And I feel so trapped

11:29:14 am

He's very gross you have no idea. Not the person ppl think

11:29:29 am

MW

1212 5333739

I know , believe me.

11:29:49 am

o

[REDACTED]
Planthropomorphism... the starting point needs thought and is hard

11:30:19 am

I know you are thinking and me too

11:30:50 am

I'm sorry BG was mean to you too.

Anyway

I have a few pieces and small ideas but no clear actionable theory on Plants.

There are a few directions but starting point hard.

Keep thinking w me

11:32:30 am

MW

1212 5333739

i can Skype, or talk later today

11:33:05 am

Ok I'm at this big boring Alzheimer meeting in London / today is biomarkers sessions. Total waste of time - I'm done around 9pm London time. If you are back in NYC I can call you when I'm done...

11:34:12 am

Sorry am still at event

Hosting a dinner for a few scientists

09:26:57 pm

They actually have some pretty good ideas - more For Google I think than BG but some creativity around how to do trials

09:27:53 pm

MW
