You are right  
Enhancement a much better space and any discoveries there can be easily translated to disease

Saw amazing immune system rejuvenation scientist today

But made me more convinced on mitochondrial transplant as the higher order (system Control) bit for energetics and anti aging

06:37:08 pm

Looks like

1. Happy microbiology
2. Rejuvenated immune system (revved up gatekeepers /microglia)
3. Young mitochondria

Love forever
