Now? Jeffrey
11:02:26 am

?
12:16:07 pm

Tonight better. Or even better, tomorrow afternoon if that is ok with you.
12:34:23 pm

Tomorrow perfect
12:34:52 pm

Perfect. Thank you!
12:35:19 pm

Topics? Artificial intelligence? Bitcoin? Genetics? Brain/consciousness?
12:53:30 pm

All of them! But maybe initially AI with when/how do we (AI eventually) get consciousness
01:00:53 pm

first , consciousness , definition. ? self aware? most of the things in your body happens without conscious control. . so over rated. . musk fears danger. deepak chopra accepts no reality to worry. . I funded the father of AI marvin minsky for 20 years. I know the subject well

01:04:01 pm

you should tell me what you have read

01:05:45 pm

Don't you fear danger like Musk? Very intrigued by Neuralink.... Did like Chopra at the beginning but have grown disappointed with him. AI fascinates me. It's rapid development. As well as how will Quantum Computing change the entire equation. My question is how soon will AI gain consciousness?

01:24:05 pm

you have to define consciousness. deepak is a friend and yes - lost . . feedback is already here. chomsky is here this weekend with me in florida he believes it is a silly question. as humans have consciousness , machines have feedback loops. so careful with terms

01:27:47 pm

I understand what you mean. And we go back to the basic question, what is consciousness... let's say then feelings... when will AI feel? And be able to communicate that feeling... and how will we know if it is real.

01:31:38 pm

I am Chomsky's biggest fan!

01:32:25 pm

Very jealous....

01:32:32 pm

noam is great. we tease each other mercilessly - feeling is just words for the moment without a clear definition. careful using words. mathematics requires a model before understanding. we have no model of feelings.

01:34:33 pm

noam now believes that language originates for internal thought . and only later pops out as communication between individuals

01:36:26 pm

I will be more careful with words...
but exactly my point. No mathematical model for feelings... therefore, that is what will make AI never like us... or will AI teach itself feelings

01:36:46 pm

AI has language... but no feelings yet

01:37:17 pm

sorry , bad question. you are speaking in broad metaphors like the weather is happy today or sad. . humans have made a word " feelings" it has a roughly agreed meaning . no more no less. . turing said that asking whether a machine can think was too silly to answer. . machines compute, people think, birds fly , not airplanes

01:39:18 pm

So that internal dialogue is what Noam believes sets us apart from other species?

01:39:56 pm

You are being harsh... or maybe you are too intelligent and you will need to teach me...
I like nothing more than learning

But if we become so cynical, then little to discuss apart from mathematical equations

01:41:18 pm

if you mean harsh , as rigorous, yes i am. . as arrogant not at all.

01:42:15 pm

o

I like rigorous and I meant it in that way

01:42:38 pm

Not at all arrogant. I can see how knowledgable you are.

01:42:52 pm

o

math equations are not very useful , modeling is. . you need to have a mental model of things to try to " understand " them. we don't yet even have a definition of understanding , in computers math or people. . anyway talk tomorrow

01:43:35 pm

you might find the website futurism useful or explore sinularity university

01:44:40 pm

singularity

01:44:46 pm

o

Thank you! You have made me think and definitely challenged me...

01:44:46 pm

I have done SU and I am subscribed to Futurism

01:45:14 pm

Love Futurism. Goes to the point

01:45:27 pm

Peter Diamantes Abundance Insider is great!

01:46:14 pm

What other sources?

01:46:27 pm

You seem to be far beyond me in knowledge... or maybe I just need a teacher. All self taught. Don't get the chance to talk to anyone about these subjects.

01:47:25 pm

these are all friends. - . each one wonderfully crazy in their own way. . the art world however still leads . when hawking came to my island. and said his dream was to go diving , i ducted tape his head to a high back chair and loaded him in a private sub, great fun

01:47:27 pm

Why art world?

01:47:55 pm

I am late for lunch. Let's talk tomorrow

01:48:06 pm

✓ Read

I am privileged to be a hobbyist in the rarefied sciences. . art world pushes the orthogonal thinking . usually way ahead of science.

01:48:42 pm

art world requires intention . not understood at all yet

01:49:31 pm
