yes and they communicate in a bouquet of language not linear like humans. . not one word at a time , but a page at a time. much more sophisticated. . human language is more simple melody, plants are symphonies , both a vertical (harmony) . tempo . and horizontal melody

Loved the article! Not sure, though, I would say plants' intelligence is more sophisticated than ours...
Impressed by the fact the Darwin already mentioned it.
But I do believe that all living things are connected.
Do you believe in a higher power/god/source?

04:57:03 am

if you mean religious underpinnings - NO. . it is easy to understand why people do. It is a hack of the system. it works. so no harm if not extreme

?

11:59:03 am

but if you find it brings you comfort. I would never argue against it

12:00:23 pm

I don't know what I feel/believe. It is not at all because it would bring me comfort, it is more because some things are so perfect that I believe there must be something higher. In no case would it be an omnipotent God. More an energy that controls.

01:52:22 pm

Could we talk on normal phone? I think I would be way too shy to talk via Skype.

01:53:35 pm

For me best after 9pm Spanish time. Where are you?

01:57:45 pm

I have very short hair (probably shorter than you...) so rollers are going to be a tough one 😬

01:58:48 pm

Face cream I can definitely manage
