

2016/09/06

Name: Epstein, Jeffrey **Scan Date:** 09/06/2016
MRN: 7206913 **Acc Number:** [REDACTED]
DOB: 01/20/1953 **ReferringMD:** Rony Shimony, MD
Age/Gender: 63/M **AttendingMD:** Adam Jacobi, MD

Summary

CT without contrast was performed for coronary calcium, chest, abdomen and pelvis evaluation. Reconstructions were transferred to a workstation for further analysis.

1. Coronary atherosclerosis without significant stenosis.
2. The calcium score is 63 (53rd percentile adjusted for age, gender and ethnicity).
3. Normal left ventricular size and systolic function. No regional wall motion abnormalities.
4. No abdominal aortic or iliac arterial aneurysm.

Scan Info

General

Contrast Agent: Medication Administered During Scan
Type: None **Type:** Metoprolol N, NTG SL 0.4mg

11:12:23 pm

Coronary Arterial Dominance: Right

ARTERIES	DIAMETER STENOSIS	PLAQUE	STENT

Significant so pays to take low dose statin

11:36:08 pm

2016/09/07

Agreed , prostatitis still there . However . I'm flying to Palm tomorw

10:23:11 am

Bruce Moscovitz

Be back in town this weekend dinner sat or Sunday?

03:05:26 pm

Leaving from night

03:54:55 pm

Friday night leaving

03:55:08 pm

2016/09/08

[REDACTED]
My b12 is up d unchanged 26 and test low 108
02:50:38 pm

Bruce Moscovitz

BM

Need b12 injection my office can give
02:53:52 pm

[REDACTED]
B12 is fine d is low
02:54:34 pm

Bruce Moscovitz

BM

D take 3000 daily
02:55:25 pm

[REDACTED]
Have been for two weeks no movement
02:56:04 pm

Bruce Moscovitz

BM

Takes at least a month to 6 weeks to change
