Ok cool - let me know when!

We just saw a cardiologist about my dizziness. He says I have mild autonomic nervous system dysfunction, which also explains my finger and toe!!

12:11:36 am

silly, total bullshit. - that is the name they give to a bunch of symptoms no more no less. it makes it appear as there is a diagnosis. when there is none. . they might well say , there is something amiss but we don't know exactly what it is. . when complicated systems are involved . these lumpy diagnosis is misleading and a waste of time. its like saying the cake tastes bad, . must be one of the ingredients . you need to experiment. more salt. try gatorade for electrolytes. . full blood test , minerals trace and others. . endocrine. . etc.

12:12:11 pm

change up the cake recipe and see how it tastes

12:13:04 pm

Yes that's my plan
