Pre-Marxist revolutionaries believed in an unusually strong equality of sex, and educated noblewomen played major roles in radical movements in the latter decades of the nineteenth century. Russian revolutionary literature in the 1840s and 1850s linked the causes of emancipation of serfs with the emancipation of the Russian woman—this literature was manifest in the Narodnik movement. Here we go again !

The " coin" space has attracted too many hustlers. Amateurs criminals. Hacking and bubble like risks. Its not a store of value nor a predictable exchange value substitute. . years away. - we can craft an instrument that meets your goals. Not try to fit your goals into current crypto-coins . Can I tell Kathy that next Saturday works . I will try to have miro .as well
