Self organizing systems . revolutions. Start with knowing. Discipline separates out the winners from the hopefuls . Seriously , no excuses. You are important in many ways , no more though than to yourself

Xeno's paradox

04:43:31 pm

If I throw a ball at the wall, when it has travelled halfway, it still has half the distance to travel. As it continues, the fraction left to travel continues i.e. one quarter to go, one eighth to go, one sixteenth to go, etc. since the denominator of the distance continues to double... I am thinking mathematically speaking, the ball never reaches the wall.
