Harry Fish

You getting better? Did the biopsy result come back?

09:07:46 pm

Allergy to cats . Biopsy not back . Shot of cefytiaone tonite

09:13:24 pm

Harry Fish

We're you around cats? Who is giving you the shot? I mix Ceftriaxone with lidocaine because otherwise your ass will hurt. That's the recommended method.

09:17:18 pm

Yup

09:18:05 pm

2016/07/30

a week of being bled, (test) pricked (allergy test) , dilated (eyes) , probed. (finger , wand , prostate , rodded (parasite) biopsied, (rash) scanned. (cat and ultrasound injected ., EKG. and no perfect answer

01:15:09 pm

for you, what if we form a pseudo insurance co with a 100% co pay, so that the hospital can code it in their system correctly. that hack might have promise.

01:15:55 pm

the patient would pay cash, the hospital could show insurance. etc

01:16:36 pm

oo

Harry Fish

I do think we have a handle on your medical issues. Severe allergic reaction + urethral infection+ decongestion medication.

01:50:26 pm

HF

is claritin a no no . or only decongestants?

01:51:27 pm

oo

Harry Fish

The issue with Sinai is laziness on their part. Not complicated. Me not participating in insurance is clearly not the norm for them. They are used to doctors losing money on insurance and having more control over the doctors. My medical practice is called "high revenue, non participating". Sinai can handle this, and should encourage more doctors to do the same. My model allows for personalized care and how I think medicine should be practiced. It allows more doctor patient interaction where I actually listen to patients. You following?

01:56:07 pm

HF

don't start

01:58:43 pm

oo

Harry Fish

Decongestants are the real culprits. Claritin is ok, not perfect. If you need it, take it, but obviously without the "D". Stop hollering.

02:00:14 pm

Tewari and I have both agreed that I would establish a concierge practice at Mount Sinai and be the director of microsurgery. This is exactly what I do now at NY Hospital. We have been at this dance for 2 years. The hold up is only the hospital administration.

02:12:25 pm

How's the ass pain?
02:18:56 pm

I'm not married hows yours
02:19:07 pm

Harry Fish

Big pain.
02:19:28 pm

That one hurt.
02:19:53 pm

ok, mount sinai has made deals before with dr that don't take insurance ., jimmy holland and Lebwall in term. so there is precedence
02:20:24 pm

they have what called a fairness committee, lawyers need to opine, it is against the law to pay someone too much money, i kid you not
02:21:29 pm

the cialis, makes the stream better. is it correct to conclude that it is not a stricture since the mechanics would not change. but a bladder opening constriction?
03:18:21 pm

Harry Fish

Stream is better likely because the effects of the decongestant is wearing off. Cialis also helping the prostate. You are correct sir (Ed McMann reference just in case you are not following). My bet regarding a structure is if you do have a stricture, it is probably small and not causing a significant blockage. Svoogs tend to have larger strictures.
04:14:07 pm

Could it be related to the spinal stenosis ??

06:58:12 pm

Harry Fish

Real spinal stenosis can affect urination. But spinal disc disease that compresses a nerve is more likely to affect urination. When you took the steroid your back pain got better. When you took clomid your back pain got better. My guess is you have symptomatic disc issues.

07:08:11 pm

I realize you have stenosis, but I doubt that your pain in the back is due to that.

07:09:52 pm

I doubt that any urination issues are related to your spinal cord issues.

07:14:25 pm

I have NO PAIN. Only claudication after walking

07:20:20 pm

Harry Fish

Did it get better after the steroid and clomid?

07:36:29 pm

steroid definitely m, clomid, somewhat

07:47:46 pm

✓ Sent

Harry Fish

That's why I think you have disc issues.

07:54:44 pm

Clomid in addition to exercise will help

07:55:04 pm
