I have an update: current DSG's (Rose Gottemoller, US) mandate ends mid-October. White House apparently doesn't want to extend her mandate until the end of the year (or until NATO summit in London in December). NATO Secretary General doesn't want to have problems with the WH. Could we try to get her extended by two months, from mid-October to mid-December?

We're all set to go to Tucson for Thursday and shoot Chomsky - have you looked at the document? Can we wrap it up so we can shoot?
