Zozo still moving forward. As you know pilots on the ground w Banks in Zim, Botswana and Liberia. Slow but forward. Have IP protected and at the very least might just sell that
03:17:14 pm

Vagus seems like the right play but not sure who is working on it.
The zozo stuff taught me a cool science thing that might blow you away. We should talk. It's a health application for rich countries.
03:23:39 pm

Foundation still engaged till August 2016.
03:23:54 pm

...FYI the tech side of the transactions thing we are working on uses sound waves instead of wifi and block chain etc to make ledger and savings/borrowing secure

But the cooler health app is using the Same ultrasonic frequency to transmit real time ICU data. It might be a way to start to change the telemetry conversation and push science a bit. Pls don't tell anyone as I'm trying to protect this IP too. It's pretty cool and no one doing yet

Moving teeth (mechanically) is interpreted by the tissue as an insult and inflammation results.

07:47:40 pm

Cute

07:47:51 pm

So...if you take antiinflammatory meds you slow your braces/teeth movement!
