"If done well"

10:50:43 am

it says only for citizens of AU

11:48:59 am

Right  
Good for Africans

Hi

Do you still know folks at Templeton fndn? I saw a really amazing bunch of brain stem cell stuff that seems like a good fit / match. I'd like to try to link this group to real funders who can push hard on this stuff. Really amazing regenerative stuff. Guy is chairman of neurosurgery at Stanford and 15 years experience doing this stuff quietly  
05:33:41 pm

Or if you know any of the other Yuri Milner or other super savvy/frontier science ppl I think they would enjoy learning about this stuff.

Makes me want to move to Stanford such coolness

Hope you are doing ok  
05:34:28 pm

Sorry to keep missing you  
05:34:33 pm

Know them all  
06:09:43 pm

Do you think it makes sense to try to introduce them? Obviously Stanford is super legit and the chairman guy is very legit

He does kinda hate women though

His work is very solid as are his collaborators

06:14:48 pm

Maybe bc he's really short

Hi

02:24:59 pm

I just got named co chair of the neurotechnology and brain science global agenda council at the WEF pretty darn cool

02:25:25 pm

Allows me to aggregate and attract and learn / convening power

02:25:42 pm

Vegas nerve

02:25:53 pm

Im in Seattle till Sunday with our old friend

02:26:12 pm

Give him a big hug from me

02:26:32 pm

02:26:42 pm

I feel soooo bad for him

Me too

02:27:24 pm

But ...

02:28:41 pm

Do you have any suggestions

02:28:46 pm

Feels like he is sort of giving up on himself and life. His brain isn't as sharp and he's sad all the time. The funnest thing he does is read.

02:45:31 pm

He has me but it is a very dangerous space for both of us.
