How's Eva
03:07:40 pm

back in hospital on vancomycin
03:08:33 pm

what do you want to do at big 3
03:08:44 pm

bgc
03:08:49 pm

That is the best plan and glad they got a vessel for the IV. Suspect she needed a few days of hydration and feeling better - glad it worked
03:28:26 pm

In terms of me -
03:28:34 pm

If at all possible and feasible I would like to do something significant that ties together my domestic and international experiences - it feels like surgeon general (an advocacy role...) is my best bet
03:29:25 pm

I worry about this administrations lack of support for women and the chances of their being thrown out of office and everyone alongside them - so that is real

03:30:15 pm

Timing for the role opening is tricky bc it could be soon. Good news it isn't policy position. It's just advocacy on health and can find some good ones.

Question is how to get there while
Also hedging -- bc if I don't get it I still need a career

03:31:41 pm

561 655 7626 now good

03:33:17 pm

Here are some parts of the puzzle that could fit together:

1. Bgc3 is opening a DC office partly to go deeper on domestic health issues.
2. Peterson fndn (mostly data and policy) want to somehow cooperate
3. Rockefeller will shape anything I want and give me a role
Or resources to do domestic health or Frontier science stuff - either in a big role there or participating w bgc3 (based in nyc but can work from seattle or DC too)

So what's the ask of bgc3

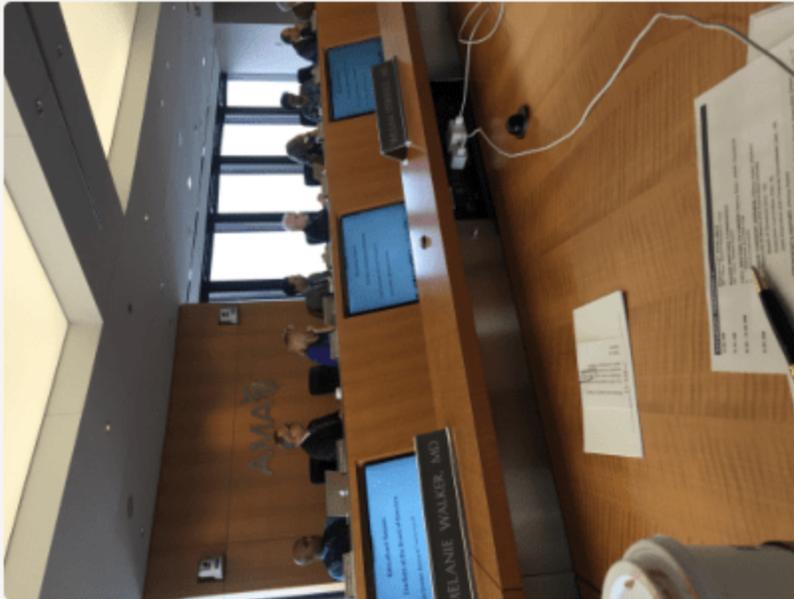

03:34:47 pm

Am at my AMA fndn board mtg
HAVE break from 12-1 Chicago time

03:35:39 pm

ok

03:35:47 pm

03:35:59 pm

Am program chair and it is super contentious right now

03:36:43 pm

Lots of conflicts everywhere

03:37:00 pm

Now?

06:16:07 pm

Have 10 minutes now

06:26:46 pm

Or - one other very real option on the table is to go back to full time neurosurgery in seattle and the university and just practice a lot and be in the hospital a lot and do nothing else

07:13:47 pm

It pays about 500-750k per year out in the real world or 300-400k in the public facilities

07:14:21 pm

And just give up on everything else and stop trying

07:14:35 pm

Would end all other career aspirations and just become "doctor"

07:18:13 pm

are you depressed.

07:57:02 pm

Not clinically.

Sadness (dysphoria) is different than depression.

I am sad that I can't find a reliable and good and fun next step despite really good and committed stuff ("career")

08:04:31 pm

It makes me sad that 25 years of world health org, gates fndn, world bank (while maintaining active clinical Career) gives me really almost zero good options

08:05:25 pm

And I feel like I'm running out of time

Medicine always around and very boring and regular

Rejoining the club of obsolete and useless individuals

08:06:03 pm

Even bills world is a bit of stupidness too

08:06:16 pm

I want to do something really great

08:10:25 pm

And I'm bored

08:10:35 pm

Don't mean to complain / you know that

08:11:20 pm

Is VP of schmeckelville at rockefeller or vp of stupidity w billg better than neurosurg at one of the busiest hospitals in the county

08:14:27 pm

2017/02/05

I think I now understand what our friends wife might have on him that keeps him very close and scared

Two things
