10:28:15 pm

On jawbone - Steve says consider and possible good things w strong voices around hosain. Steve sometimes had very good insight. Sounds like your experience lousy and Company in big trouble

10:29:33 pm

But

10:29:35 pm

Middle East is perfect perfect to test clinical wearables (due to no legal or policy restrictions) and also to experiment w remote telemetry (don't have to leave home / great for gender issues there)

10:30:58 pm

Clinical wearables market is 50x bigger financially than consumer wearables / way better margins and also ready for major distribution

10:31:49 pm

oo

Disruption not distribution

10:31:56 pm

Food for thought
I guess we have to see what hosain does in coming weeks and months

He's well positioned - hope he doesn't drop the ball. Sad to hear he's not honest. Steve says he's a hustler.

10:32:55 pm

He said he could even hustle and hustler ... but that it was
Worth a second thought and he NEVER says that. You know STEVIE. He says no to everything.

10:33:47 pm

And big big quiet Conversations
Ongoing for a cool job for Stevie
