are you killing me ? This is my biggest dream in life now !!! I was shy to tell you! and shy to ask for great opportunities! but if someone asks me what is the maximum goal of communicating with you this will a good university and after a good job somewhere in ny! I really died from happiness! and if you help me prepare for a good university and help me with the entrance !! I can not imagine what else I want more !!! I was sure that you see me being in Russia and studying there, but I do its now and it's not things what I dream about !! I would really like to live somewhere far away)) ahah)) and not only spend time , also I dream work in perspective !!!
