Although crying is a normal part of life for everyone, sometimes people cry for what appears to be no reason at all. In fact, you may be feeling completely happy and start crying. Some people cry when they are happy or surprised, and some cry when they are angry or anxious. There are many reasons why this may happen to you, such as an underlying physical hormonal condition .

i know. Normally I would just tell you what to do. But I don't know you well enough. If I did, I d say. What are you crazy. How many times in life do opportunities present themselves. However as I don't know you and I do know you are very confused in general. I will have to make believe I have no opinion and say, totally your decision
