chomsky, liked mu mbjects, mactions. mental objects and mental actions. he explained to wolfram why wolfram language is doomed. wow

09:40:05 am

I am now staying in new york until tues. so if you prefer we can do monday morning at 11 or after 3.

09:40:48 am

Deepak

What is your preference  
I can try and make tonight by 7  
Can arrange my schedule to meet at 11 or 3 on Monday tomorrow  
Love 🙏❤️

09:48:30 am

The entire universe is mobobjects  
This is an amazing insight and should enter the dictionary

09:50:53 am

Every perceptual experience is a mobject  
This includes body/ brain / universe  
Mobjects are modified forms of consciousness experienced in consciousness and made out of consciousness  
They appear and disappear in space/time  
Consciousness itself is non local and not in space time

mactions are actions on mental objects. like rotating a ball in your mind. . it seems to involve the same brain places as actions in the material world.

10:03:44 am

Deepak

Yes !!!  
Mactions evoke the experience of the universe  
Different mactions in different species evoke different universe  
Evolution of species is evolution of mobjects and mactions in consciousness  
Darwin needs an update

10:07:27 am

I'm about to board  
Let me know your preference for me to come and see you  
Tonight 7 PM  
Or  
Monday 11 AM or 3PM ?

10:30:52 am

Tonite AND tomorw at 3

10:32:55 am

Deepak

Will plan !  
See you tonight  
Here is how your vocabulary fits the worldview I'm in favor of  
Brain/Body/ Universe are interdependently co arising symbolic representations of  
species specific consciousness - mobjects and mactions in species of consciousness  
If you think it's a good idea I can do a draft for an article to be published with input  
from your prestigious luminaries as coauthors

The principle of plenitude asserts that the universe contains all possible forms of existence. The historian of ideas Arthur Lovejoy was the first to discuss this philosophically important principle explicitly. Lovejoy distinguishes two versions of the principle: a static version, in which the universe displays a constant fullness and diversity, and a temporalized version, in which fullness and diversity gradually increase over time. a 400 year old idea
