yes, does this mean you don't need the legislation for 14 dAYS.. ? I even asked nicely for permission for a mini excavator to clean beach, they said why not by hand. ? and my worker fell through the dock, injuring himself , we have waited 6 months for approval to change the wood. I did it as an emergency repair. IT IS WROING

Jeff I can't do DPNR everyday including weekends. I know that the commissioner reached out to me on Friday having to do with your property. I was so busy that I was unable to get back to her tomorrow. I'm hopeful that she's not going to brief me on more perplexing issues.

I'm away but I'm told that jp actually came and forced his way onto the island in the face of being told the manager was not there. He issued another cease and desist which she will respond to -but Erika said that apart from the cistern inspection-it is my home . Thought you should know
