Island
05:20:43 pm

[Redacted]

Yay! Having fun?? There's a Fndn called GATSBY that is Sainsbury's money
05:21:04 pm

Their big portfolio is neuroscience - some cool stuff a lot of computation.
05:21:04 pm

I will try to learn more about their projects for you! Also Paul Allen trying to up his game a bit but still pretty silly stuff
05:22:24 pm

Ok well I miss you!
05:22:32 pm

[Redacted]

Steve?
05:23:00 pm

He's doing really well. Just saw him this wknd and in fight now back to DC

05:23:12 pm

I have a good feeling about his next steps

05:23:12 pm

Not sure why (maybe I've had too much coffee!)

05:23:12 pm

Marc says he's super optimistic too and Steve making friends out there and building trust. That sounds promising. I'm gonna think positive!

05:23:12 pm

Oh sorry not FIGHT am ON FLIGHT back to DC. All fine. Same.

05:25:06 pm

Are you on island forever and ever??? When do I get to see you?

Hi!!!

02:59:12 am

Do you know john and Lizanne Megrue

03:00:15 am

no,, should I ??

09:33:23 am

[REDACTED]

Dunno he's private equity and she's real estate. They are very nice and smart ppl.

02:09:04 pm

He does a lot of development funding etc but he's too smart to keep Doing that and looking for something to do post his retirement and he is like 56

02:09:04 pm

megrue

02:20:36 pm

[REDACTED]

Yup

02:28:13 pm

They both are super smart.

Read about calabi-yau shapes and theoretical possibilities / helps understand the nature and number of possibilities in string theory (superstring vibrations)

I think that we are thinking about life wrong and that longevity as measured by time isn't quite right

Seems like within mitochondria there's a "clock" that has a similar predetermined set of actions or events that could possibly best case span 120 years. But it's more about the pace of use of these actions and the care at which each phase is managed. More like a savings account than a clock.

there seems to be limit of 50 times division. ? but not with different oxygen levels? your hyper baric is from the 30 s. . and many us clinics have hyped it. .

08:11:44 pm

Don't know

08:12:45 pm

I think the answer is in mitochondria

Oxygen is just fuel. Pressure is just another condition.

Everyone now mostly focused on extension and that's no so interesting

I want to slow down division time and reduce variation and damage to mitochondria

08:14:35 pm

oo

(Mine)

08:14:38 pm

it is highly unlikely to be one thing. no matter what

08:16:12 pm

Let's go back to systems 101

08:16:44 pm

No water = die

08:16:51 pm

No fuel = die

08:16:56 pm

No energy = die

08:17:01 pm

There are some high order inputs that sit above the smaller parts and are deal breakers

08:17:24 pm

Just sent you some outside the box ideas for your consideration

Raj at rockefeller (new prez) asked me to help him over next 18-24 months build a Frontiers in life sciences program that I could come run when I'm done w my fellowship

He just took over and has to sort legacy issues and budgets and his org chart but he wants to build something true to rockefeller roots in breakthrough science and wants me to run or help run - could be fun

I think that could be a space for BG to engage he joined rockefeller and other donors to build this "green revolution for Africa" and my guess is that if we had a different sort of "quantum revolution" in life sciences he'd want to join but dunno

Not to sound paranoid or anything (or maybe it's a good thing for me?) but do you think there are security cameras on the public docks here in seattle? I wonder how to find out.

05:55:41 pm

Look
06:39:54 pm

[REDACTED]

I never go out there

06:45:13 pm

I guess I can

Public docks suspect marina safety matters but very sleepy quiet seems dumb

06:45:38 pm

Boss away on vacation till after holiday anyway but no news there

06:46:01 pm

Will be in NYC for rockefeller fellow ceremony and time w teams sept 26-28 are you around?

Also in Boston few days before will see ed and a few others
