Wow Weinstein
09:43:16 pm

[Redacted]

not over by a long shot
09:43:44 pm

[Redacted]

Ugh not fun
09:45:43 pm

Fun w Nathan?
09:46:53 pm

[Redacted]

yes , your name didn't come up
09:50:08 pm

[Redacted]

Ok hope he's doing ok
Larry is out for blood
10:03:41 pm

Poor Boris too
10:08:59 pm

why?
10:09:44 pm

At least for me and boris access to BG being restricted unless larry joins

10:10:13 pm

Great meetings w b and he plans a time and place etc then I get cancellation notes from Larrys admins

10:11:01 pm

Or b tells me to do something (even w larry present) then larry tries to shut it down behind the scenes

10:12:41 pm

The usual

Anyway - how's your island house?

10:13:00 pm

devastated
10:13:09 pm

Build an underground lair like the James Bond guy

10:14:48 pm

You know with all the stuff on Weinstein now could be a great time to remind ppl that it isn't just in Hollywood and it isn't just movie producers - b is very guilty of this

How are you doing? Did you like any of the scientists
02:16:10 pm

Yes good list

The IP lawyers got back to me and said yes let's try super good idea for a company /
and that they had been thinking about some similar stuff (mitochondria) so maybe
there something to do there

our patient isn't crying!

this procedure is called inferior petrosal sinus sampling ... we put catheters into the venous sinuses where the pituitary gland drains ... then we take blood samples directly from the sinuses to determine if there is a tumor or other endocrine defect responsible for symptoms this is a locator scan to confirm anatomic placement ... and, a very fancy but minimally invasive way to get a blood sample from deep inside brain plumbing ... phlebotomy on steroids

Thought you'd enjoy
Cool picture and we only do 1-2 per year

Weird tax question

Should I create [REDACTED] md as an LLC to accept fellowship payments and any "consulting fees" from bgc3 or keep doing stuff as an individual

07:12:03 pm

20

And paying personal taxes
