05:29:48 am

I've been putting all my angio and brain art in one place / made a site but am not publishing it

Will you take a look and see what you think

Go to the menu on the top left and where it says WORK there are three sections

One is about fragility (all black and white)

One is about resilience (all
In color)

One is about humor / perspective

Work in progress

05:30:13 am

ok

10:48:36 am

Looks like lipstick or dental hardware but is actually a motion artifact (swallowing) during external carotid injection

So beautiful and spooky. You can see her eyes are closed too

01:21:43 am

Wow
01:22:33 am

My art 😊
01:23:13 am

Great
01:23:30 am

I sent you my little collection
Hundreds of these
01:23:48 am

On way to Denver now to do some Teaching and learning talk this wknd?
01:24:16 am

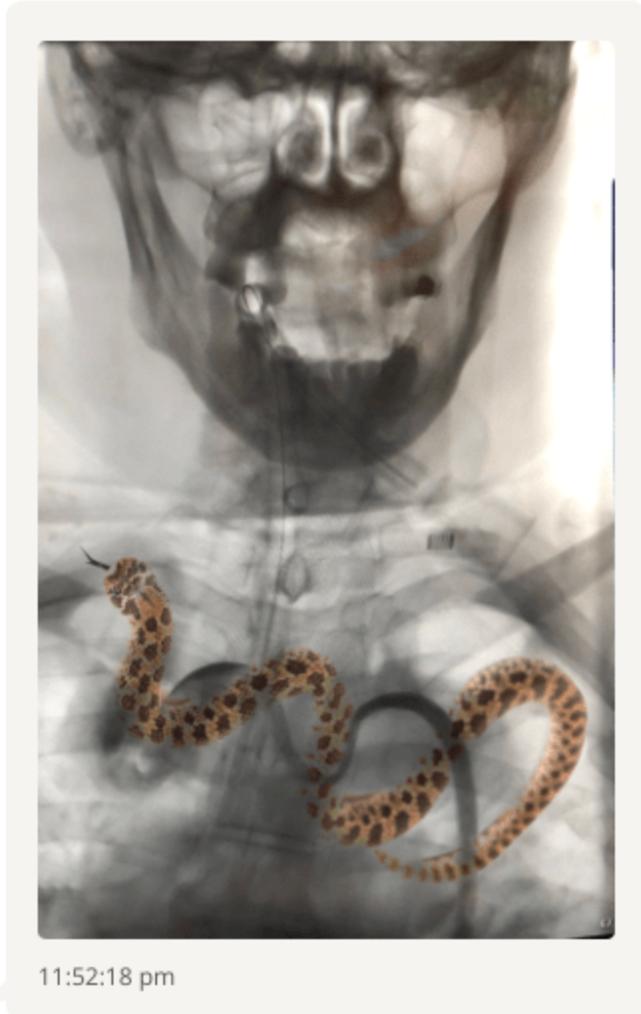

Cool
01:27:25 am

2018/08/17

More art I made. You can see the awful snaky innominate artery in the chest I struggled getting into the brain

11:52:18 pm

2018/08/21

beautiful

05:04:02 am

Really well done

10:09:44 am

2018/08/25

Normal on the left

12:47:02 am

FRANKENVESSEL on the right

12:47:13 am

👉

12:47:20 am

2018/08/26

Are you free now? Will probably need to run to surgery in about 20 minutes

06:31:33 pm

👉

It's 11:30 am seattle time now

06:31:48 pm

Cell212-533-3739

06:32:17 pm

👉

2018/08/28

Im also looking for the part of the brain that tells time duration . Lots of silly hypothesis

10:33:49 am

👉

Must be autonomic somewhere

Probably a subtraction be something parasympathetic and something sympathetic

Like basal ganglia intrinsic oscillation minus SA node in heart or something

01:27:31 pm

Or cerebellum

01:28:06 pm

Not sure . Those might be the clock. But the sensor may be more subtle. Sleep interrupts it. As does anathesia. Depressed people are more accurate. yup

01:29:48 pm

Maybe the retina

01:30:39 pm

So amazingly overdesigned to just "see"

01:30:57 pm

Question would be would the blind sense time differently. What does it mean to sense time. Certain psychedulics. Cause time issues

01:34:30 pm

Is time a taught thing or is it merely succession of events

01:35:06 pm

Not sure

01:35:12 pm

First need to define. . again like all the other senses. It only works in a narrow band. Auditory visual etc. we don't sense the seed alive - too long. Sounds. Too short . Etc

01:37:16 pm

oo

Why taste by the way

01:37:59 pm

So complicated

01:38:05 pm

Time has to be related to something bigger and constant
So it must be a sense related to light

03:18:31 pm

oo

Or gravity

03:26:09 pm

oo

✓ Sent

It's not constant

03:26:21 pm

More based on bigger things around you

Light seems better proxy

03:26:38 pm

Everyone even plants and animals need the same metronome right?

03:27:03 pm

In reading about plants I keep coming across something that bugs me - they have "10 or more" senses

03:27:39 pm

That will give a clue

What are their senses?

How do they weight them? Make decisions?

03:28:55 pm

Ok surgery now more soon

Funky bilateral cavernous carotid fistula

03:29:26 pm

no
