I'm sorry, but I do want you to understand my view. I want to say, that you like, when I stay with you and you play at this time - cool, I am happy, that I can make your day better, but as for me, maybe I'm not free yet as you, but how I feel now, I like be alone when I play, and it is crazy situation for me now to do it on Skype. I feel sexual excitement when my play is a secret and to be honest I not always feel sexual excitement from toys and wish to use it. But sometimes i like. And thank you so much that you present me the first one) I start to feel excitement from word, from touch, not from my eyes, I need some connection between a parter - it is excite me. Maybe I just need a time to accept your view and use it. But right now I understand you, but I definitely can't use it for me. Sorryyyy

I do adore your freedom in all situations, you do what you want and feel really enjoy. When I stay with you I'm really happy and relax, because I feel your freedom and i start to feel it also. In Russia isn't freedom atmosphere. Here is to many limits. But I really want to be like you!
