**Subject:** Re: 50D-NY-3027571 1B Items  
**Date:** Tue, 11 Mar 2025 13:25:07 +0000  
**Importance:** Normal

Good morning!  
The first restore is moving quickly and on track to be done tomorrow. Then we will kick off the 6TB restore.

I have given case access to SA [REDACTED] and SOS [REDACTED]. SA [REDACTED] TFO [REDACTED] and IA [REDACTED]s all need to have their DCAP accounts either created or re-activated if they have expired.

Please let me know if you would like any additional updates. Otherwise I can go directly with SSA [REDACTED] for future updates.

Thanks  
[REDACTED]

Thank you!  
+SA [REDACTED] TFO [REDACTED], SA [REDACTED], IA [REDACTED]s, and SOS [REDACTED]

They are the case team w SSA [REDACTED] and will need access to DCAP.

Restore of the first set (8.5TB) kicked off successfully. Will know more about timing tomorrow! Once that is completely restored, we will start the second restore job (about 6TB).

Please let me know to whom I should provide access on DCAP, at your earliest convenience.

Thank you,

Working with OTD remotely now to start the data archive unpacking. Will advise when this step is complete, and we have a total time to restore estimate. We are looking at a total of approximately 14.6 Terabytes of archived data to unpack. I have already uploaded and verified 1B146 (Optical media) to DCAP and 1B136 is secured until we can determine the best way to move forward with it (obscene material).

Please let me know if you have any questions or concerns.

Thanks

**Subject:** 50D-NY-3027571 1B Items

All,

Per guidance from A/ADIC [REDACTED], we are sending 2x SAs now to pick up the below 1B items for passage to WFO CART. Per conversations with OTD [REDACTED], WFO CART is the best situated to handle the decompression of 1B144 and 1B145, and 1B146 is believed to have logs that will assist with understanding the previous work completed by CART on this case. 1B136 contains CSAM and will be handled per policy.

[REDACTED]: See below items that [REDACTED] and [REDACTED] will be transferring to NVRA. They will be at the V Street ECR in approximately one hour.

NY: FYSA

[REDACTED]: [REDACTED] and [REDACTED] will be in touch re arrival.

50D-NY-3027571 1B Details:

- 1B136: Highly responsive material to include nude images and videos from digital evidence processed. This information is potentially not in Relativity due to the sensitive nature of the images, which could include CSAM. Portable hard drive.
- 1B144: Two LTO 6 tape cartridges containing an Arcserve backup of digital evidence.
- 1B145: Three LTO 6 tape cartridges containing an Arcserve backup of digital evidence.
  - LTO tapes (Linear Tape Open) are used for backup and archiving data. These LTO tapes require a specific system to decompress the archive and restore it to our network for review. The LTO tapes in this case file can hold approximately 12.5 Terabytes (5 tapes of 2.5TB). We believe 1B144 and 1B145 will contain a backup of all digital evidence in the case file, however we will need to process the LTO tapes to confirm.
- 1B146: One DVD-R containing log files and FTK reports. Admin logs that may help us better understand CART processing of digital evidence in the case.

Thank you for all the assistance.
