Hi ██

That sounds fantastic. I attached the two spreadsheets you all sent back to me. On both spreadsheets the second tab is the one that has the victims that could not be entered into VNS.

Thanks a million, thats a huge help.

Hey All,

██████ I would recommend us loading the businesses into VNS and put "Legal Representative" as the POC. We have done this in the past. It is not best practice, but we can go that direction as long as you all are good with it. That way hopefully it will get routed to the right spot.

Ana is out of the office the rest of this week but ill return on Monday. As long as this can wait until then, I will meet with her and get this rolling.

Thoughts?

I am teleworking today and out on military leave tomorrow. Let me look into it a bit more when I get back next week and speak with my counterpart at DOJ to see if we have any other options.

Thank you

Thanks ████

VOSS is the team who initially uploaded the victims and told us that businesses could not be uploaded. Whatever you think works the best, please let us know.

Thanks a lot.

I think with that number of victims, the best thing would be to work with VOSS team, who are copied here, and provide them a list of victims so they can try to clean it up as much as possible and they can work with the VNS contracting team to see there is a way to enter them into VNS without the POC. We could look at sending letters potentially addressed to business manager or company CEO... or some other options.

Thank you

██

Thanks ██████

There are 352 victims who we were unable to enter, some because they were international but mostly because they are businesses. Whatever you can do yo help would be much appreciated.

██

Unfortunately we cant enter businesses into VNS without a POC. How many victims does the case have and how many of them are businesses without a POC?

Thank you

████████████████████████████████

Hi █████

I hope you are doing well. I am reaching out about the above case. We have numerous victims who are businesses but no direct POC. How can we get these into VNS?

████ – am I missing anything?

Thanks

Hi again, just wanted to follow up about the victim uploads ████ did for this case. There was the issue with many of the victims being businesses. I was hoping we could figure out how to get them into VNS. Thanks
