Importance: Normal

Morning [REDACTED] – I will work with the OTD/DFAS team to get a timeline for completing the requested actions.

In addition to NYFO and OTD EM, is this Maxwell recording file request being coordinated through CID EM? I just want to make sure besides OTD, that this request is being tracked/approved at the Ops HQ division level and 7th floor before release.

[REDACTED] – please call me when you get this note.

Thanks,

[REDACTED]

Thank you.

The redactions are the first request from [REDACTED] under separate cover.

The why behind how the recordings did the Tallahassee 8 and xx5 is second.

And the third is to put it all together for public consumption, removing all metadata, time stamps, file names, etc.

I've cc'd [REDACTED] who will be the POC.

Thanks again!

+ [REDACTED]. See below from ASAC [REDACTED].

Thanks [REDACTED] - I'll defer to [REDACTED] and [REDACTED] with regards to how they accomplish the request. Regarding "what" is being asked, we leave that to NYFO and DOJ.

[REDACTED] folks will look at the files this morning and based on the work needed to accomplish the request, they'll advise whether noon is reasonable, if not, they'll provide a timeline that allows the request to be properly satisfied.

If you could provide names of those who should receive the finished product that would be great. If it's a matter of putting the final product back in the share folder I believe they can do that as well ([REDACTED] can better address).

Thanks for the continued comms on this.

Best, [REDACTED]

Subject: Maxwell Recording Files

Good morning.

Thank you for assisting us and DOJ with the redactions.

Since this is going to be released to the public, I believe it is important all meta data, including names and times of the file, be striped to not create any issues where issues don't exist.

I will defer to OTD on the best way to do that.

Perhaps we create two options for DOJ.

One which is similar to the files [REDACTED] gave access, with the redactions. And the other having all substantive audio in one file, starting with the 4 way on the 24th and going continuously with the substance until concluded on the 25th w redactions.

Thanks again.

See below on what [REDACTED] noted:

Thanks for the call earlier. Below is the list of substantive recordings identified by file name, length, date, and time. You will see that there are two that are shorter than others. When I listen to them and use my recollection from those parts of the proffer, each of the two short recordings sound like they are portions of the longer recording before or after.

If we could get an answer on why these two files are particularly short, that would be helpful.
