Good evening everyone,

We have to create a summary for [REDACTED] by tomorrow 9:00 a.m. for what has been reviewed so far. Below is my summary. Let me know if you need to add anything.

1b136 review contained pornographic images from websites as well as pornographic videos from websites. The review contained images of nude, age difficult females in sexually suggestive poses, in various locations including a beach, and an apartment.

Some images of females appear to be located at various residences owned by Jeffrey Epstein and taken on a personal electronic device.

Some images contained CSAM.

Some images appeared to have recognizable people such as a known girlfriend of Jeffrey Epstein.

Outstanding.

The GC is looking for a summary of what we have been reviewing this far. Recognizing we still have more to go, please draft a summary of what we have viewed thus far in broad terms.

Let's plan to get this done by 930 tomorrow so I can review it before submitting it at 10a.

Thanks.

**Today we accomplished the following**

- 20 out of 30 folders comprising of various images and videos from 1B136 have completed review.
- We added 5 personnel to assist, 3 from HVRA and 2 from LIRA. They should be ready to begin review tomorrow.
- 1B144 is in the process of being reevaluated so we can review the files. As noted yesterday, the files were proprietary and involved possibly re-processing. SA [REDACTED] is coordinating with CART to find a solution.
- 1B145 has approximately 1.5 more days to finish being restored.

Hey [Redacted]

Please make sure number of folders completed is consistent between the document and email content.

Please also keep 1B tables consistent with line items. One of them has extra boxes.

Thanks again for updating and submitting each day!
