I could not play our copy either, so what they got is what we have. The CART examiner tried and could not get it to play. It is his opinion that either the recordings use an outdated software to play which we don't have or the disc is bad.

Hey [REDACTED],

See below email. Can you or someone at the RA make a copy of the disc in 1A10 of the Epstein file? The copy we provided did not work for DOJ.

[REDACTED] -

We look forward to meeting with you at the USAO-WPB – 2nd floor conference room – at 8 am on Thursday. Thank you so much for accommodating our tight schedule!

You probably have access to the USAO offices, but, if not, call on my cellphone – 202-532-5509 – when you hit the building, and we'll let you in.

One thing: the disk you gave us with the state GJ recordings is no good. It contains a slew of unopenable audio files that are all exactly the same length, suggesting there was some copying glitch. Our very experienced and resourceful IT person was unable to figure out what was wrong. I'll bring it with me to give back to you. We're very hopeful that you could try again to copy the recordings for us, before we arrive. Please?

With thanks,
