So - regarding the Epstein evidence - OIG is going to take the rest and then the FBI is going to draft a letter to OCME about the evidence in their possession that will give permission for OIG to take custody directly from OCME. [REDACTED] is supposed to do that when he returns. It would be better if the OIG agent can just pick up the evidence that we have and the letter all at the same time

"hahaha - yup! but i don't mind the coordinating as long as someone can do the handoffs! then i'll just close it out - except for Epstein - that needs to stay pending inactive due to some FOIA litigation (which i believe i told you about)"

not far but just far enough for long island lol

when to the islander game yesterday
