any system and or motherboard shipped from Premio Computer (Colorado) Inc. has been rigorously tested and "burned in". This is our way of showing appreciation for our continuous business relationship with you. Please find this checklist of components we have tested in your system and a print out of the test report. Our test is printed using "Trouble Shooter" software, which will correctly identify the speed of the CPU, the size of the HDD, the number of COM and LPT ports and a listing of all the drives in your system.

At Premio Computers Inc. thank you for your business and the opportunity to serve you. We would love to receive your comments on our work. Please address all comments via e-mail to steve_chang@premiopc.com. You can also find us at www.premiopc.com - or <http://support.premiopc.com>.
