To: Richard Kahn <███████████████ &g=;

Basically the process is:

1. Start the OLD machine holding down T unti= the dancing Thunderbolt or Firewire logos appear.

2a. <=span>If the OLD machine has a Thunderbolt port (HAS to have the lightening=bolt icon above) then use the Thunderbolt cabl= to link the two machines.

- or -

2b.=If the OLD machine does not have a Thunderbolt port, then plug one =nd of the FireWire cable into the old machine,=and the other into the FireWire to Thunderbolt adapter, and the Thund=rbolt end into

(Both cable solutions arrived earlier.)

3. Run setup, wh=n asked to migrate existing data, choose from another disk, and select ONL= the
home folder from the Documents &=Data section. UNCHECK ALL OTHER OPTIONS (Applications,
<=iv>Computer Settings, Other files & folders, etc.)

=font face="HelveticaNeue-Light">4. When prompted to log into iCloud use the AppleID that we use iTunes /=AppleTV:
 jeeitunes@gmail.com <mailto:jeeitunes@gma=l.com> | Jenjen12

5. Once the migration completes, log into the new machine with the =ld machine's account credentials.

6. Install:

Microsoft Office 2011: <https://www.dropbox.com/s=xvnafvjm4sx1sig/Office%202011%20%2814.3.9%29.pkg?dl=0>

=span style="font-family:HelveticaNeue-Light;white-space:pre-wrap"> VLC: 8.
<http://get.videolan.org/vlc/2.1.5/macosx/vlc-2.1.5.dmg= target=> Once you've confirm=d the data is on the new
machine and working, we can erase the old machine=C2
by opening /Applications/Utilities/Disk U=ility.app.

Select the i=on for the old volume underneath the icon that should say "Target =isk Mode" (I'm assuming
the c=mputer is still attached via Target Disk Mode — if not, repea= steps 1 & 2 above) and click Erase.
zeros=(this may take a couple hours).

Once it completes, eject the old drive and shut the machine =own. It's now ready to be disposed of safely
=/span>(the next person will have to reinstall the operating system).<=font>
