We invite you to explore the revamped Origins Education Portal

So many of the issues and challenges we face today demand clear access to knowledge being developed at the forefront of science and technology. To solve global problems we need to understand and employ all the different tools available from a variety of disciplines.

The [Origins Education Portal](#), an innovative, open-access resource archive, was designed to bring users exclusive intellectual content from our private academic workshops. Taking full advantage of the remarkable Origins Project workshops and to ensure their value lasts well into the future, we will continue to curate this dynamic and interactive global resource center.

Our first offering from the Origins Portal is the [Origins of Violence: An Overview](#). The curated materials found in the Origins of Violence are informed and inspired by one of our high-level academic workshops held in April 2014. The second brand new and interactive curated offering is primarily video-based and is entitled [Origins of Extinctions](#), which gives a global audience direct access to the provocative Origins Project academic workshop, Extinctions as Creative Destruction, held in February 2015.

More content will be added to further extend the reach of our public and private events with top scholars, researchers, and cultural icons. This is only the beginning.
